Psychology BS- Student Learning Outcomes (SLOs)

01 Communicate Effectively

Students will be able to communicate effectively in writing using APA (American Psychological Association) style, the accepted publication style of the discipline. Coverage agreements for the required Research Methods (PSYC 220/250), upper division (351+), and Advanced Lab (46x) courses address this learning outcome with a required written assignment in APA (American Psychological Association) style.

2a Apply Basic Research Methods I

Students will demonstrate an appreciation and knowledge of basic research methods in psychology and show evidence that they can apply this understanding in the areas of research design, data analysis, and interpretation.

2b Apply Basic Research Methods II

Students will demonstrate an appreciation and knowledge of basic research methods in psychology and show evidence that they can apply this understanding in the areas of research design, data analysis, and interpretation.

03 Understanding Data Analysis and Interpretation

Students will demonstrate an understanding of basic statistical concepts and procedures including descriptive analyses, inferential analyses, and the interpretation of quantitative data sets.

04 Sociocultural & International Awareness

Students will demonstrate an understanding of (and sensitivity to) cross-cultural differences related to psychological phenomena.
