Finance BS/Minor—Student Learning Outcomes (SLOs)

Synthesis
Students must integrate knowledge from supporting disciplines of statistics, economics, accounting, and math, adding to their knowledge bases and skill sets to holistically analyze financial issues.

Communication Skills
Students must be proficient in both written and verbal presentation. They must be able to write professional financial reports and present results and suggestions in a persuasive way.

Quantitative Fluency
Students demonstrate the quantitative fluency, ability, and computational skills to solve financial problems.

Global and Civic Responsibility
Students demonstrate an understanding of the global and ethical dilemmas faced by firms in financial activity and reporting and the role that financial professionals must play in acting as representatives of companies and/or investors.

Intellectual Innovation and Creativity
Students must proficiently demonstrate the ability to adapt to changing situations and show self-driven ability to create financial tools with emphasis on outcomes that are flexible when conditioned upon changing controls allowing them to answer questions from multiple perspectives.
